SCHEDULE

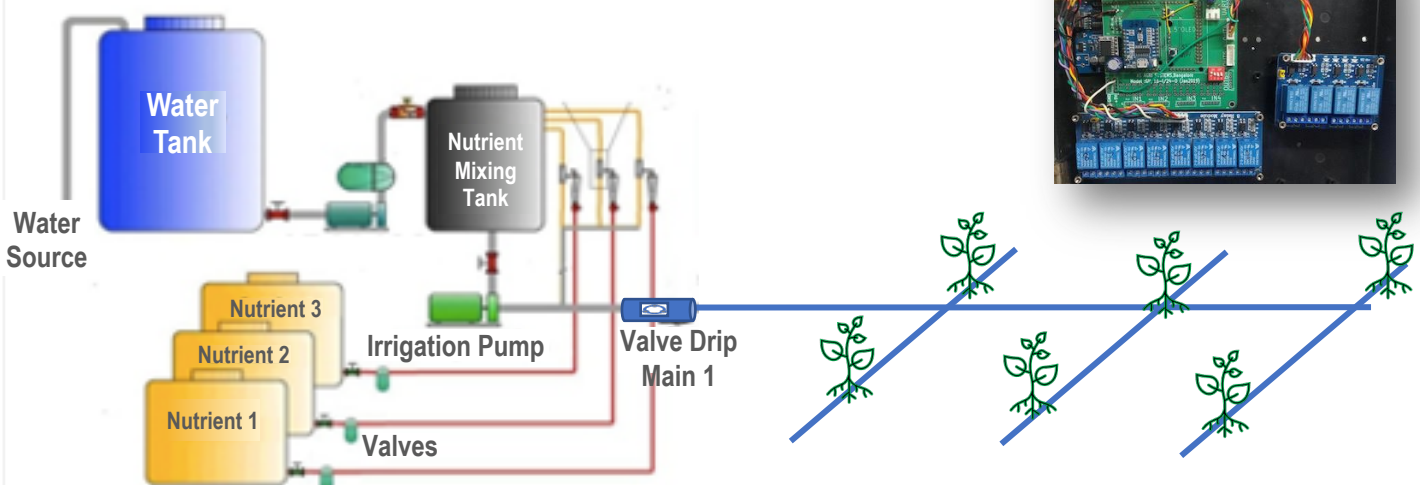

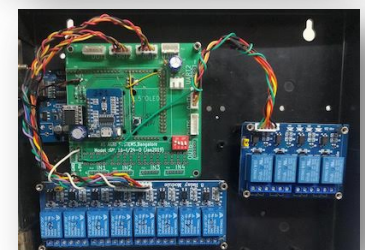

Samaya

SMART SCHEDULERS

Product Brochure

Do you have a need to schedule your pumps, venturi remotely?
Do you want to know if the device got turned ON/OFF?
Do you want to be free from uncertainty of Power Availability?

Sasya introduces connected scheduler – **Samaya** for complex scheduling requirements of devices (pumps, venturi, valves) for farms & Greenhouses. **Samaya** schedulers can be configured easily by experts remotely. Multiple devices can be scheduled in a given order and can be activated and tracked on Sasya IoT platform.

Fit **Samaya** and forget about issues with your Device Scheduling and monitoring 24X7 remotely and even in case of unpredictable power supply

Smart Scheduler Samaya

Connected Schedulers for complex device management

Highlights
